

TECHNICAL DATA SHEET CLEANER FOR FAÇADES

DEFINITION

Acid with additives of great effectiveness for the cleaning of vertical and horizontal structures with removal effects of plaster incrustations, cement and even calcareous and saltpetre.

APPLICATION

This product can be diluted depending on the needs of each application. We recommend a previous test with a dilution made with a portion of FAÇADES CLEANER and three portions of water, and from here decrease or increase the proportion of water as it is needed. Spread the prepared product and rub the surface thoroughly with a root brush. Once the operation is finished rinse with abundant clean water.

PRECAUTION

Avoid using this processing on limestone or marble, because they will get an immediate matt shade. It is essential the use of glasses and protective rubber gloves for its manipulation. Wash with abundant water the possible splashes on the skin.
